

A message from Dan Dial

In 1976, I wanted to experiment with Kirlian photography to *see* the aura of the body. After doing some research, I decided to develop a system to view auras without the mess and expense of photographic processing. Using simple components I had around the shop, I put together a crude high-voltage, high-frequency oscillator. When completed, it produced the display I was trying to achieve. I discovered that since I was using high-voltage, multiple-wave oscillations rather than high-voltage direct current, I was able to see more detail in real time than in timed exposure. I could *see* gaps in the field when a person had something wrong with him or her. And the size of the field varied with the person's overall health as well.

It took me about 12 years to pin down what the Molecular Enhancer was doing. During that time, I tested it on many different problems in others and myself.

I have found that what it does is *power* the body's own systems of repair. The Enhancer does not cure or kill anything. It simply allows the body to repair itself by providing the energy necessary to do so.

"Natural forces within us are the true healers of disease." —Hippocrates

Please visit our Web site,

www.dansenhancer.com,

for more complete information about *Dan Dial's Molecular Enhancer™*, including:

- The 10 most asked questions
- How to use it and cycle times
- Contraindications
- History and technical description
- Care and maintenance

If you have any questions, comments, or experiences you would like to share, please visit: www.dansenhancer.com and click on the Bulletin Board.

Order forms are on the Web site.

Prices are:

US/Canada (120 volts): \$2,490

International (240 volts): \$2,680

Price does not include shipping and handling.

Visa and MasterCard accepted.

Dan Dial's Molecular Enhancer™ is an experimental device currently undergoing research.

Dan Dial's Molecular Enhancer™ provides the body with the energetic foundation it needs for effective self-healing.

Resonance

In the world of physics, all objects have a natural, or *resonant*, frequency at which they vibrate when disturbed or set in motion. Resonance occurs when oscillating objects synchronize their movements, and as a result they absorb more energy. ***The Molecular Enhancer uses the principle of resonance to increase the body's energy.***

Biological cells are known to possess electrical properties. They generate electromagnetic fields, but also use external electromagnetic energy of the right strength and wavelength. Dan Dial's Molecular Enhancer™ does not pass current through the body; instead, it provides small amounts of energy via discrete oscillating waveforms throughout the entire radio-frequency spectrum. By supplying multiple waveforms - a wide bandwidth of electromagnetic energy - the Enhancer allows the body to choose the unique frequencies with which it will resonate. ***A large amount of energy is not required;*** the physics of resonance tells us that the greatest and most harmonious movements result from small amounts of energy applied at the proper frequencies.

A body in a state of health is a body in a state of balance whose systems and structures are working together.

Energy

Much research in recent years has shown the importance of maintaining the electrical and energetic health of the body. Living cells use bioelectricity for a variety of chemical processes, including storing metabolic energy, triggering internal changes, communicating with one another and activating repair mechanisms.

A healthy living cell has a fixed *membrane potential* (the difference in electrical charge between the inside and outside of the cell) of approximately -60 to -100mV.

When used regularly, ***Dan Dial's Molecular Enhancer™*** will bring the electrical charge level of the body's healthy cells to the same level, thereby restoring cellular integrity.

When healthy cells exhibit the same electrical properties, the body appears better able to recognize and remove (through natural physiological processes) the damaged or genetically different cells, since those cells exhibit a different charge.

The Molecular Enhancer is a relatively straightforward device. Because it uses the innate behaviors of its conductors, it does not require adjustments, and is unlikely to malfunction if treated with care.

The Holistic Approach

Dan Dial's Molecular Enhancer™ is a valuable addition to other therapies. When the body has a strong energetic foundation, which the Enhancer helps provide, it is better able to repair itself. Using the Enhancer alongside treatments designed to destroy specific pathogens can be especially helpful, since the Enhancer provides the body with the necessary movement and energy to process the toxic debris that results.

All ages can enjoy the benefits of the Enhancer. For support during a health challenge, use the Enhancer one hour, three to four times per day. For routine health maintenance, use it one hour, three to five times per week.

In an ideal world - unpolluted, stress-free – Dan Dial's Molecular Enhancer™ would perhaps not be necessary. As it is, most of us, especially those of us who live in an urban environment, are hard-pressed to find time and resources to care for ourselves, let alone clean air to breathe. To combat the unique challenges of modern life, the body needs energy. Although the Enhancer assists in creating that energy, the device is best thought of as a companion to other natural energy providers, such as joy, organic foods, close contact with the earth and a positive outlook.
